

Evolv™ Hardened Connectivity Port Cleaner with Pushlok™ Technology

CORNING

Part Number: CLEANER-PUSHLOK

Pushlok™ technology is the key component enabling smaller terminals for FTTX networks than ever before. Designed for use in nearly every access network environment, the Evolv™ HC Solution with Pushlok™ Technology is small enough to be placed in existing handholes or pedestals where space is paramount, on building facades, or in aerial networks (pole- or strand-mount). Port cleaners are a key accessory to have in the field when installing FTTX networks. The Evolv HC port cleaner with Pushlok technology is compatible with both Pushlok and OptiTap® connectors and Evolv HC terminals and multiports. Single-fiber port cleaner accessories are proven effective for removing the following from connector end faces: skin oil, hand lotion, Arizona road dust, pre - and post -mate graphite, salt, isopropyl alcohol residue and distilled water residue. These cleaners are easy to use and offer over 525 cleanings.

Features and Benefits

Cleaning system rotates 180 degrees

Provides a full cleaning of the connector end face

Cleaning fibres dissipate static

Addresses any electrostatic discharge (ESD) concerns

Numerous engagements

Offers over 525 cleanings

Dual Compatibility

Compatible with both Pushlok™ and Optitap® connectors and multi-ports

Single Fiber port cleaner for Pushlok and Optitap connectors and multiports

Evolv™ Hardened Connectivity Port Cleaner with Pushlok™ Technology

Standards

RoHS

Free of hazardous substances according to RoHS 2011/65/EU
