CORNING

Centrix™ System

CORNING

The central office, or headend, is the brain of your network and must address sophisticated infrastructure challenges to meet today's explosion of data services.

We interviewed more than 3,000 central offices and data centre operators in all regions and the outcome remained the same – the infrastructure must be reliable, high-quality, flexible, manageable, scalable, and visible to support a 24/7, year-round operation.

The Corning Centrix™ system is a high-density optical cabling solution that simplifies installation and improves the performance in the central office environment. Centrix provides an increased system density, when compared to traditional splice or preterminated systems, and offers the highest port density in the market. Corning® ClearCurve® bend-optimised fibre is the core element ensuring reliability when designing custom-engineered components – thanks to its significant reduction in macrobend loss, even in the most challenging bend scenarios. This technology enables Corning to provide significantly greater density across the range, combined with a simple design and integration for electronic areas within the central office. In addition, preterminated components allow for reduced installation time and faster moves, adds, and changes (MACs).

With reliability being critical, you need products that optimise your network's capabilities today and can scale for the future.

Centrix™ Single Cabinets

Centrix single cabinets provide space for up to 120 Centrix cassettes, with a maximum capacity of 4,320 LC or 2,880 SC single-fibre ports. All functions are accessible from the front of the cabinet. Patch cord management enables in-cabinet cross-connects with a single patch cord length of 4 m. Feeder cables can enter the cabinet from the top and bottom. The bottom channel function allows for easy routing of patch cords across cabinets in a row. The cabinet comes assembled for fast deployment.

Available Options:

- Single cabinet (cross-connect application)
- Single cabinet (equipment interconnect)
- Single cabinet (splice concentrator)

Single Cabinet Without Protection

Single Cabinet With Protection and Bottom Channel

Single Cabinet Splice Concentrator

Centrix™ Single Cabinets

Features and Benefits

- All front access
- 40 rack units
- Supports up to 4,320 splices and 120 cassettes within a 0.27 m² footprint
- Integrated patch cord management
- Single 4 m patch cord for in-frame cross-connect
- Quick installation feature for Centrix™ housings
- Cable entry on left, right, or both sides
- Cable strain-relief plates included
- Numbered cable routing hubs included
- Open-cabinet version available
- Version with bottom channel available
- Full protection with long doors/walls available
- Assembled or non-assembled (flat-pack) versions available

Centrix™ Housings

Centrix housings provide industry-leading, ultra-high-density connectivity when combined with Centrix splice, patch, splitter, WDM, MTP®, and other configurations of pre-terminated cassettes. With the unique Centrix design, all cassettes are exchangeable – sliding into the housing to make real structured patch cable management possible, while providing unprecedented finger access without the need for tools or any other accessories. The various range of mounting brackets provide flexible installation options for 19-, 21-, and 23-in cabinet requirements. Centrix cabinets enable fast and easy installation of the housing through its quick-mount feature.

Loaded and stubbed housings enable faster network deployments through reduced installation time and reduced packaging. Easy cable deployment and quick installation features for the pre-connectorised housing in the Centrix cabinet ensure safe, on-demand enhancements of existing structures at maximum port density.

Stubbed housings are configurable for stub lengths up to 100 m in 5 m steps, and up to 250 m in 10 m steps. The cable entry side of the housing will be matched with the orientation of the cabinet.

*Corning reserves the right to choose a different cable, as long as the key parameters are maintained. Key parameters are fibre mode, cable colour, and flame rating.

†Corning's proprietary binderless FastAccess™ technology refers to the combination of a Corning FastAccess technology jacket with an innovative technology used to bind cable construction through the manufacturing process, eliminating the use of binder yarns and waterblocking tapes.

Centrix™ Loaded Housings

Centrix loaded housings are available with Centrix splice cassettes in different configurations. The cassettes are loaded with adapters, single-fibre pigtails, and splice accessories already deployed in the housing. This allows for fast installation time and reduced packaging.

Features and Benefits

- Loaded housing ready for splicing
- Faster system setup and reduced packaging materials
- 300 mm depth for installation in TELCO cabinets
- Easy port access and identification
- Integrated patch cord guide supports patch management
- Front and top labelling for easy identification
- Captive and transparent covers on both sides of the cassette
- Separated bare fibre and tube slack storage up to 2 m by design
- Multiple tube entry from the rear or both sides of the cassette

CORNING

Centrix™ Splice Cassettes

The Centrix splice cassette provides single-fibre ports with LC, SC, or LSH connectivity. The cassette is loaded with adapters, coloured single-fibre or ribbon pigtails, splice organizer, and protectors. A drop handle provides fibre port protection and patch cord labelling on front and top of the cassette allows for easy identification. The cassette can slide into Centrix housings and is secured with a latch mechanism. The jumper guide is on the left side of the cassette, but can be easily changed to the right. The transparent and captive top and bottom covers enable easy handling and visual inspection for troubleshooting. The multiple tube entry points on the cassette allow for flexible loading of buffer tubes and bare fibres in the cassette.

Features and Benefits

- Easy port access and identification
- Integrated patch cord guide supports patch management
- Front and top labelling for easy identification
- Captive and transparent covers on both sides of the cassette
- Separated bare fibre and tube slack storage up to 2 m by design
- Multiple tube entry from the rear or both sides of the cassette

Centrix™ Patch Cassettes

The Centrix patch cassette provides LC, SC, or LSH single-fibre ports for patch cords or trunk single-fibre legs. The entry is on the front left, right, or rear side of the cassette and enables cross-connect applications. A drop handle provides fibre port protection and patch cord labelling on the front and top of the cassette allows for easy identification. The cassette can slide into Centrix housings and is secured with a latch mechanism. The jumper guide is on the left side of the cassette, but can be easily changed to the right. The transparent and captive top and bottom covers enable easy handling and visual inspection for troubleshooting.

Features and Benefits

L = Left-front access
R = Right-front access

**Rear access will allow for 24 SC max or 36 LC max.
†Front access will allow for 12 SC max or 24 LC max, due to front entrance space required.*

Centrix™ Splitter Cassettes

The splitter cassettes are available in various splitter options with LC or SC ports allowing for greater network design flexibility. The integrated splitters are based on planar lightwave circuit technology, which has a compact size suited for density applications. All splitters are compatible with Corning's low-bend-loss ClearCurve® optical fibre (compliant with ITU G.657.A2 standards) with a diameter of 250 µm. A drop handle facilities fibre port protection, patch cord organization, and port labelling. The retractable cassette is secured in the housing with a latch mechanism for tool-free installation and removal.

Features and Benefits

- Easy port access and identification
- Integrated patch cord guide supports patch management
- Front and top labelling for easy identification
- Compliant with IEC-61753-1 and Telcordia's GR1209 and 1221 standards

Coarse Wavelength Division Multiplexing (CWDM) Cassettes

Corning CWDM multiplexers and demultiplexers utilise advanced thin-film filter technology designed to work with less expensive, non-temperature-controlled lasers. CWDM filters are available in industry-standard 20 nm spacing with options for a 1310 nm RF overlay bypass, as well as single or bidirectional test ports.

Features and Benefits

Passive and outside plant hardened
No power or temperature-controlled environment required

Epoxy-free optical path
Higher reliability

Low insertion loss and high isolation
Minimum impact on insertion loss budgets and lower transmission costs

 66 = 6 device mux and demux

See Notes 1, 2, and 3.

3 Select first range of two adjacent wavelengths (channels must be consecutive).

Z = No wavelength
 K = 1270 A = 1450
 L = 1290 B = 1470
 M = 1310 C = 1490
 N = 1330 D = 1510
 P = 1350 E = 1530
 Q = 1370 F = 1550
 R = 1390 G = 1570
 S = 1410 H = 1590
 U = 1430 J = 1610
 T = Triplexer (1310 + 1490/1550)
 W = 1310/1550
 VH = 1590 Quadplexer
 VJ = 1610 Quadplexer
 See Notes 1 and 2

4 Select 1310 option.

- = No 1310 WDM option
 Y = With 1310 option

5 Select second range of two adjacent wavelengths (channels must be consecutive).

Z = No wavelength
 K = 1270 A = 1450
 L = 1290 B = 1470
 M = 1310 C = 1490
 N = 1330 D = 1510
 P = 1350 E = 1530
 Q = 1370 F = 1550
 R = 1390 G = 1570
 S = 1410 H = 1590
 U = 1430 J = 1610
 See Notes 1 and 2.

6 Select test port.

T = Single 95/5 test port
 D = Bidirectional 99/1 test port
 N = No test port

Notes:

- 1) For selections 3 and 5, must choose a total of four digits – two for each set of adjacent wavelengths; wavelengths not to exceed total number of channels chosen in Section 2.
- 2) If choosing mux OR demux channels, wavelength digit "Z" (no wavelength) will be chosen for one or more of the four wavelength digits.
- 3) Choose the number of devices in Section 2; for example, three quadplexers or four "W" devices.

Not all part number configurations are available. Please confirm availability with a Corning Optical Connectivity Care Representative.

Methodology for calculating the specification for multiple channel CWDM devices

Reflect IL 0.4 dB - Pass IL 0.7 dB - Connectors (pair) IL 0.3 dB

Examples:

A 4-channel CWDM. Maximum IL = $0.4 \times 3 + 0.7 = 1.9$ dB, when it is with connector the maximum IL = $1.9 + 0.3 = 2.2$ dB

An 8-channel CWDM. Maximum IL = $0.4 \times 7 + 0.7 = 3.5$ dB, when it is with connector the maximum IL = $3.5 + 0.3 = 3.8$ dB

Dense Wavelength Division Multiplexing (DWDM) Cassettes

Corning DWDM multiplexers and demultiplexers utilise advanced thin-film filters and thermal waveguide technology designed for low insertion loss, high isolation, and excellent temperature stability in a totally passive device. They are available in various channel counts at ITU-industry standard 100 and 200 GHz spacing in both the C and L band. Corning's DWDM devices are Telcordia GR-1209 and GR-1221 compliant and have a wide variety of packaging options.

Features and Benefits

Passive and outside plant hardened

No power or temperature-controlled environment required

Epoxy-free optical path

Higher reliability

Low insertion loss and high isolation

Minimum impact on insertion loss budgets and lower transmission costs

Transport protocol independent

Flexibility

8-Channel Mux or Demux, 1470-1610 With 1310 Port, SC UPC Cassette

DWDM Cassette Ordering Information

1 Select connector type.

Single-mode:
3C = SC UPC simplex
6C = SC APC simplex
A9 = LC UPC duplex adapters
B3 = LC APC duplex adapters

2 Select channel spacing.

1 = 100 GHz*
2 = 200 GHz
*Select 1 for single-channel devices.

3 Select type.

A = Mux or demux*
B = Mux and demux
*Select A for single-channel devices.
See Note 1.

4 Select number of channels, set one.

nn = Number of channels
04 = Four channels
08 = Eight channels
11 = Eleven channels
16 = Sixteen channels
32 = Thirty-two channels*
*See Note 2.

5 Select ITU grid first channel, set one.

21 = C21 (1560.61 nm, 192.10 THz)
ZZ = No selection
See Note 1.

6 Select number of channels, set two.

nn = Number of channels
04 = Four channels
08 = Eight channels
11 = Eleven channels
16 = Sixteen channels
32 = Thirty-two channels
00 = No selection
See Note 2.

7 Select ITU grid first channel, set two.

21 = C21 (1560.61 nm, 192.10 THz)
ZZ = No selection
See Note 1.

8 Select test port.

Y = Single 95/5 test port
D = Bidirectional 99/1 test port
N = No test port

Notes:

- 1) For selections 3, 5, and 7, pick odd (C21, C23, C25...) or even (C20, C22, C24) starting points for 200 GHz channel spacing.
- 2) For selections 4 and 6, 16 channel building blocks are used; e.g., a 36-channel arrangement concatenates to two 16-channel building blocks.

Not all part number configurations are available. Please confirm availability with a Corning Optical Connectivity Care Representative.

Centrix™ MTP® Modules

Centrix MTP modules provide the interface between MTP trunks or patch cords to LC or CS connectivity, which can be used for cross-connects or into the electronics. The MTP ports are available on the left or right side of the front of cassette for individual network designs. The MPO adapters split the incoming fibres in LC or SC single-fibre ports. A drop handle facilitates fibre port protection, patch cord organization, and port labelling. The cassette can slide into Centrix housings and is secured with a latch mechanism. The jumper guide is located on the left side of the cassette but can be easily changed to the right side with accessories.

MTP 12-Fiber LC UPC Module

1 Select fibre count per cassette.

12 = 12 fibres
24 = 24 fibres
36 = 36 fibre, only LC

2 Select adapter type

3C = SC UPC
6C = SC APC
A9 = LC UPC
B3 = LC APC

3 Select preterminated MTP type.

89 = MTP 12 F pinned E9 Ultra
90 = MTP 12 F non-pinned E9 Ultra

4 Select polarity.

U = Universal
S = Straight

5 Select MTP position.

Front Access:
L = Left
R = Right

Rear Access:
B = Back

Centrix™ Stubbed MTP® Modules

Centrix stubbed MTP modules provide the interface between high-density MTP trunks to LC or CS connectivity, which can be used for cross-connect applications. The 60 cm MTP legs are available on the left, right, or the rear of the cassette for individual network designs. The MPO adapters split the incoming fibres in LC or SC single-fibre ports. A drop handle facilitates fibre port protection, patch cord organization, and labelling on front and top of the cassette. The cassette can slide into Centrix housings and is secured with a latch mechanism. The jumper guide is located on the left side of the cassette but can be easily changed to the right side with accessories.

00

- 1

Select fibre count per cassette.
12 = 12 fibres
24 = 24 fibres
36 = 36 fibres, only LC
- 2

Select adapter type.
3C = SC UPC
6C = SC APC
A9 = LC UPC
B3 = LC APC
- 3

Select preterminated MTP type.
89 = MTP 12 F pinned E9 Ultra
90 = MTP 12 F non-pinned E9 Ultra
- 4

Select leg length.
K = 60 cm
Other lengths available on request.
- 5

Select polarity.
U = Universal
S = Straight
- 6

Select cable type.
MI = MIC™ central tube cable
- 7

Select cable entry direction, viewed from the front.
L = Left
R = Right
B = Back (only for 19-in cabinets)

Patch Cords

Value Prop

- The Centrix™ cable assembly provides fast installation with patch cords
- Populate up to four cabinets with one single patch cord length (4 m) for all cross-connects in single, dual, or quad cabinets

Density

- Simplex or duplex

Cable Types

- LSZH™ or plenum

Cable Diameter

- 1,6 mm or 2,0 mm with bend-optimised cable

Connector Options

- LC, SC, or LSH
- APC or UPC polishing

SC to SCA

LC to LC

Reference Standard Single, Dual, or Quad Cabinet Cross-Connect Patch Cord Part Numbers

Part Number	Description
444401G3Z16004M	Patch Cord, single-mode, SC APC to SC APC, 4 m long, 1,6 mm outer diameter
585801G3Z16004M	Patch Cord, single-mode, SC UPC to SC UPC, 4 m long, 1,6 mm outer diameter
222201G3Z16004M	Patch Cord, single-mode, LC APC to LC APC, 4 m long, 1,6 mm outer diameter
020201G3Z16004M	Patch Cord, single-mode, LC UPC to LC UPC, 4 m long, 1,6 mm outer diameter
224401G3Z16004M	Patch Cord, single-mode, LC APC to SC APC, 4 m long, 1,6 mm outer diameter
191901G3Z16004M	Patch Cord, single-mode, LSH UPC to LSH UPC, 4 m long, 1,6 mm outer diameter
202001G3Z16004M	Patch Cord, single-mode, LSH APC to LSH APC, 4 m long, 1,6 mm outer diameter

Corning recommends 1,6 mm jumpers for use in the Centrix solution. Full-size Centrix frames support 2,880 to 4,320 jumpers predicted on the connector selection. Other configurations are available. Please consult your customer service representative or sales manager for more information.
