

3M[™] Planar Light Circuit (PLC) Optical Splitters

3M[™] Planar Light Circuit (PLC) Splitters are fully passive optical branching devices that exhibit uniform signal splitting for the most advanced optical networks. These planar silica waveguide devices are packaged in small form factor housings to offer compact management into 3M modules and splice trays.

Bend insensitive, reduced water peak singlemode fiber is used to provide low bending loss in applications which require tight radius or significant handling by the technician. These splitters are manufactured and tested to GR-1209/1221 to provide the high performance and reliability needed in the outside plant environment.

Applications for the PLC splitters include all FTTH network architectures (GPON, BPON, EPON), Passive Optical LAN and CATV.
