Our Cat.6 copper interconnect products work together to provide an easy-to-use solution for deploying high-speed connections throughout a building. The RJ45 jack is a key component in this system. These RJ45 jacks have been certified by an independent test laboratory to hardware certification. Each jack component is able to terminate to any certified Cat.6 TIA, ISO/IEC and EN standards for hardware performance, confirmed by independent laboratory certifications. The jack's unique three cable entry points help make installation simple. The traditional one-click design enables an easy, tool-less termination on Cat. 6 Unshielded twisted pair cables, meeting industry performance standards.

Features and Benefits

Tool-less jack
Easy and quick to install - reliable connection
The conductors are wired in a single operation

Three cable entry points
Less cable bending required - better compliance with minimum bend radius

Reusable
Jack can be reused even after wiring mistake

No untwisting of pairs before termination
Minimized stripping length - limited pair untwist - pairs kept together, no wire guide required

Clip-in mounting
Designed to fit many other accessories

Accepts solid and stranded conductors
Enables "jack-to-plug" cables to be manufactured using stranded conductors

Integral shutter
No additional shuttering required on faceplates

Hardware Performance
Can be mixed and matched with other Hardware certified copper cable and patchcords

IEEE 802.3bt-2018 performance (4PoE)
